PROFESSIONAL SUMMARY

IT professional with 2 years of dedicated IT support experience and 7 years in technical roles spanning web infrastructure, hosting, and systems integration. Completed the Google IT Support Professional Certificate (2026) and CompTIA Network+ (N10-009) training, with hands-on skills in Active Directory, DNS, DHCP, Group Policy, Microsoft 365, and virtualization developed through a self-administered Windows Server 2022 lab. Experienced in diagnosing DNS, SSL, hosting, server, and API failures in live production environments, and in delivering remote technical support to clients and cross-functional teams across the United States, United Kingdom, Canada, and Australia. Seeking a Help Desk, Desktop Support, NOC, or Junior Systems Administrator role.

CERTIFICATIONS & TECHNICAL TRAINING

Google IT Support Professional Certificate — Google via Coursera | Completed July 2026 | Credential ID: OTZHR9DSV0VZ

- Five-course program covering troubleshooting methodology, customer service, networking, operating systems, system administration, and security.

CompTIA Network+ (N10-009) Professional Training — RivanCyber Training Institute Inc.

- Configured Cisco routers, switches, access points, IP phones, and CCTV systems; performed network troubleshooting across TCP/IP, routing, and switching.
- Built and managed virtual machines in VMware Workstation and Oracle VirtualBox running Windows Server, Windows 10/11, and Linux, including a local web server reachable across multiple VMs.
- Logged and resolved incidents through ticketing systems; performed introductory security testing with Kali Linux.

TECHNICAL SKILLS

IT Support & Help Desk: Hardware and software troubleshooting, end-user support, incident management, root cause analysis, remote support, ticketing systems, printer installation and troubleshooting, customer service

Networking: TCP/IP, DNS, DHCP, LAN/WAN, Cisco router and switch configuration, network diagnostics (ping, tracer, ipconfig, nslookup, telnet)

Microsoft Technologies: Windows 10/11, Windows Server 2022, Active Directory Domain Services, Group Policy (GPO), Microsoft 365, domain join, file sharing, NTFS permissions

Virtualization & Containers: VMware Workstation, Oracle VirtualBox, VM deployment, snapshot management, Docker

Scripting & Automation: PowerShell, Python, REST APIs, webhooks, n8n, Zapier, event-driven integration, data-sync troubleshooting

Tools & Platforms: Jira, Trello, Asana, Git and GitHub, cPanel, FileZilla, Command Prompt, Microsoft Office

Security & Infrastructure: CCTV installation and maintenance, SSL certificate management, basic cybersecurity concepts, Kali Linux fundamentals

TECHNICAL PROJECTS

Windows Server 2022 Home Lab — Self-built and self-administered

- Deployed and administered Windows Server 2022 across VMware Workstation and Oracle VirtualBox, configuring Active Directory Domain Services with organisational units, users, groups, and security permissions.
- Configured DNS and DHCP for client connectivity, joined Windows clients to the domain, and applied Group Policy Objects to manage users and computers.
- Configured shared folders and NTFS permissions, administered Microsoft 365 accounts, and troubleshoot Windows networking and authentication issues using PowerShell and Command Prompt.

Self-Hosted Services & Automation Lab

- Stood up and maintained containerised local services with Docker, including a self-hosted AI inference stack (Ollama, Llama 3.2) and n8n workflow automation.
- Built an event-driven document-ingestion pipeline connecting a Telegram front end to a locally hosted service via REST APIs and webhooks.
- Developed a Python job-aggregation tool that scrapes multiple sources and parses results against custom matching criteria.

PROFESSIONAL EXPERIENCE

Web Developer — Technical Integrations | GrowthGetters (United Kingdom, remote)

July 2024 – Present

- Build and maintain event-driven integration pipelines using webhooks, Zapier, and REST APIs connecting WordPress, Gravity Forms, and CRM systems, eliminating manual data entry across client accounts.
- Diagnose and resolve live API and webhook connectivity failures, restoring real-time data sync between front-end systems and external applications.
- Provide remote technical support to an international cross-functional team, translating business requirements into stable production integrations.
- Administer client hosting environments, resolving DNS, SSL, email routing, and deployment issues.

Front-End Developer | CyberOptik (concurrent contract)

October 2023 – July 2024

- Performed technical troubleshooting on live websites and conducted QA testing across multiple browsers and devices to isolate performance and functionality faults.
- Collaborated with developers and project managers to diagnose and resolve client-reported technical issues.

Web Developer | XDNA Digital Agency Inc.

July 2022 – March 2024

- Diagnosed and resolved website, server, and API production incidents, maintaining uptime and system stability across client environments.
- Provided technical troubleshooting support for client websites and deployment processes.
- Mentored intern developers on systematic troubleshooting practices.

Front-End Developer | Blink Digital

November 2021 – July 2022

- Supported website deployment and server configuration; investigated and resolved technical faults across multiple company sites.
- Assisted with production support and ongoing system maintenance.

Web Developer | Sytian Productions

June 2019 – October 2021

- Maintained WordPress sites and hosting environments; managed migrations, FTP transfers, and database updates.
- Resolved hosting and website technical support requests for clients, acting as first-line technical contact.

IT Support Technician | Yaramay Computer Maintenance and Services

2017 – 2019

- Delivered on-site IT and desktop support for office users and small businesses, diagnosing and repairing hardware, software, and networking faults.
- Installed, configured, and maintained desktop computers, printers, routers, and CCTV systems; configured internet connections and local area networks.
- Performed scheduled preventive maintenance to improve system reliability and reduce recurring incidents.
- Coordinated hardware procurement with vendors and maintained equipment records.

ADDITIONAL TECHNICAL SUPPORT EXPERIENCE

- Developed, maintained, and provided ongoing technical support for 50+ websites and web applications, resolving hosting, DNS, SSL, email, deployment, and performance issues.
- Delivered remote technical support to clients across the United States, Canada, the United Kingdom, and Australia, working across time zones with non-technical end users.

EDUCATION

Bachelor of Science in Information Technology — New England College | 2019
