

KENN REJOSO BENIN

Web Developer | AI Developer

Cavite, Philippines | kbenin24@gmail.com | +63 969 137 2675 | [linkedin.com/in/kbenin24/](https://www.linkedin.com/in/kbenin24/) | <https://kbenin.github.io/>

PROFESSIONAL SUMMARY

Web Developer with over 5 years of experience designing, developing, and maintaining responsive websites and web applications using HTML5, CSS3, JavaScript, PHP, WordPress, and modern front-end technologies. Experienced in converting UI/UX designs into pixel-perfect interfaces, optimizing website performance, ensuring cross-browser compatibility, and collaborating with designers, developers, and clients to deliver high-quality digital solutions.

Recently expanded expertise into Artificial Intelligence, workflow automation, and AI-powered applications through hands-on projects using Python, Docker, Ollama, Llama 3.2, n8n, AI Agents, Webhooks, Telegram Bot integrations, GoHighLevel, Gravity Forms, and Zapier. Built local AI environments, automated real-time workflows between mobile and desktop devices, integrated AI models into business processes, and developed CRM automation solutions. Passionate about learning emerging technologies and building AI-powered automation.

TECHNICAL SKILLS

Languages: HTML5, CSS3, SCSS, SASS, JavaScript (ES6+), jQuery, PHP, Python

Frontend: Responsive Web Design, Bootstrap, Tailwind CSS, Cross-Browser Compatibility, Web Accessibility

WordPress: WordPress, Elementor, WooCommerce, Advanced Custom Fields (ACF), Custom Theme Development, Gravity Forms

AI & Automation: Docker, Ollama, Llama 3.2, n8n, AI Agents, Prompt Engineering, Workflow Automation, Local Large Language Models (LLMs), Telegram Bot Integration, AI Chatbot Development

CRM & Integrations: GoHighLevel (GHL), Zapier, Webhooks, REST APIs, CRM Automation, Lead Automation

Tools: Git, GitHub, GitLab, cPanel, FTP

Design: Figma, Adobe XD, Adobe Photoshop, Adobe Illustrator

PROFESSIONAL EXPERIENCE

Web Developer | GrowthGetters (United Kingdom)

July 2024 – Present

- Engineered event-driven automation pipelines using Webhooks and Zapier, reducing manual data entry by 100% across client CRMs.
- Developed custom, responsive WordPress themes and architectures integrated with GoHighLevel to capture, validate, and route high-volume user leads securely.
- Optimized webhook payloads and REST API endpoints to ensure real-time, zero-latency data synchronization between front-end sites and external applications.
- Built scalable workflow automations connecting WordPress frontend forms, Gravity Forms, and CRM systems to streamline business operations.
- Collaborated with international cross-functional teams to translate strategic wireframes and UI layouts into pixel-perfect, high-performance web applications.
- Researched and implemented local AI development environments and workflow automation tools to increase deployment efficiency.

Front-End Developer | CyberOptik

October 2023 – July 2024

- Developed and maintained WordPress websites following client branding guidelines.
- Customized website templates and integrated content.

- Ensured responsive design and cross-browser compatibility.
- Performed quality assurance testing and resolved front-end issues.
- Improved website performance through front-end optimization.
- Technologies: HTML, CSS, SCSS, JavaScript, jQuery, WordPress, Elementor.

Web Developer | XDNA Digital Agency Inc.

July 2022 – March 2024

- Developed custom WordPress themes and website functionality using PHP and JavaScript.
- Converted Figma, Adobe XD, and Photoshop designs into responsive websites.
- Customized WordPress themes based on project requirements.
- Integrated third-party APIs and custom business solutions.
- Optimized websites for SEO, responsiveness, and performance.
- Collaborated with designers and project managers throughout development.
- Technologies: HTML, CSS, JavaScript, PHP, WordPress, Git, ACF.

Front-End Developer | Blink Digital

November 2021 – July 2022

- Built responsive websites using HTML, SCSS, JavaScript, and WordPress.
- Developed custom WordPress themes from design mockups.
- Created reusable UI components and responsive layouts.
- Performed testing, debugging, and deployment support.

Web Developer | Sytian Productions

June 2019 – October 2021

- Developed WordPress websites and WooCommerce stores.
- Created responsive interfaces from Photoshop and UI mockups.
- Implemented custom website functionality and third-party integrations.
- Maintained website security, updates, and enhancements.
- Collaborated with designers and stakeholders to deliver client projects.

AI & AUTOMATION PROJECTS

AI Workflow Automation

- Designed and developed workflow automations using n8n.
- Integrated Ollama running Llama 3.2 for local AI inference.
- Connected applications using REST APIs and Webhooks.
- Built AI-powered workflows that automate prompt processing and task execution.
- Developed event-driven workflows connecting multiple applications.

Real-Time AI Assistant

- Built a real-time AI assistant connecting Telegram, n8n, and locally hosted Llama 3.2 AI models.
- Enabled communication between mobile devices and desktop-hosted AI.
- Configured webhook-based messaging for instant AI responses.
- Automated prompt processing using locally deployed large language models.
- Developed AI agent workflows capable of responding to user requests in real time.

CRM & Workflow Automation

- Built workflow automations in GoHighLevel (GHL).
- Integrated Gravity Forms with GoHighLevel using Zapier and Webhooks.

- Automated lead capture, CRM updates, and follow-up workflows.
- Reduced manual data entry through automated synchronization between WordPress and CRM systems.
- Configured workflow triggers, notifications, and business automation processes.

Local AI Environment

- Built a local AI development environment using Docker and Ollama.
- Installed and configured Llama 3.2 models for offline AI inference.
- Learned prompt engineering, model deployment, and AI workflow orchestration.
- Explored AI agents and conversational AI automation.

PROJECT HIGHLIGHTS

WordPress Development

- Developed and maintained more than 50 WordPress websites.
- Built custom themes, Elementor websites, WooCommerce stores, and landing pages.
- Optimized websites for speed, accessibility, SEO, and user experience.

Email Development

- Developed responsive HTML email templates.
- Ensured compatibility across major email clients and devices.

API Integration

- Integrated third-party REST APIs into WordPress websites.
- Built custom integrations to automate website functionality and business workflows.

EDUCATION

Bachelor of Science in Information Technology

New England College — 2019

CERTIFICATIONS

- Google IT Support Professional Certificate
- CompTIA Network+ (N10-009) Training

CORE COMPETENCIES

Front-End Development, WordPress Development, HTML5, CSS3, JavaScript, PHP, Python, Responsive Web Design, Website Optimization, AI Workflow Automation, AI Agents, Prompt Engineering, Local LLM Deployment, Docker, Ollama, Llama 3.2, n8n, Telegram Bot Development, Workflow Automation, GoHighLevel, Zapier, Gravity Forms, CRM Automation, REST APIs, Webhooks, Git, GitHub, Agile Development, Problem Solving, Continuous Learning
