PROFESSIONAL SUMMARY

Technical support and infrastructure professional with 7 years of production experience diagnosing and resolving live web, hosting, and integration failures — DNS, SSL, email routing, server configuration, migrations, performance, and REST API and webhook connectivity. Currently supporting a UK-based agency remotely, working across time zones with international teams and non-technical clients. Combines hands-on WordPress, PHP, and hosting-stack expertise with formal IT infrastructure training (Google IT Support Professional Certificate; CompTIA Network+ N10-009 training). Seeking a remote Technical Support Engineer, Application Support, or Hosting Support role.

TECHNICAL SKILLS

Hosting & Web Infrastructure: DNS records and propagation, SSL/TLS certificates, cPanel, FTP/SFTP, site migrations, database updates, email routing and deliverability, caching and performance troubleshooting, uptime and stability

WordPress Stack: WordPress core, custom themes, Elementor, WooCommerce, ACF, Gravity Forms, PHP, MySQL, plugin conflict diagnosis

APIs & Integration: REST APIs, webhooks, event-driven pipelines, payload debugging, Zapier, n8n, GoHighLevel, HTTP status and header diagnosis

Support & Operations: Incident management, root cause analysis, ticketing systems, remote support, escalation, client communication, documentation

Networking & Systems: TCP/IP, DNS, DHCP, LAN/WAN, Windows Server 2022, Active Directory, Group Policy, Microsoft 365, VMware, VirtualBox, Docker

Scripting & Tools: PowerShell, Python, Git and GitHub, Jira, Trello, Asana, command line diagnostics (ping, tracer, nslookup, netstat)

PROFESSIONAL EXPERIENCE

Web Developer — Technical Integrations | GrowthGetters (United Kingdom, remote)

July 2024 – Present

- Administer client hosting environments and resolve DNS, SSL, email routing, and deployment issues across a live client portfolio.
- Diagnose and resolve production API and webhook connectivity failures, restoring real-time data sync between front-end systems and external applications.
- Build and maintain event-driven integration pipelines using webhooks, Zapier, and REST APIs connecting WordPress, Gravity Forms, and CRM systems.
- Provide remote technical support to an international cross-functional team, translating business requirements into stable production integrations.

Front-End Developer | CyberOptik (concurrent contract)

October 2023 – July 2024

- Performed technical troubleshooting on live client websites and conducted QA testing across browsers and devices to isolate performance and functionality faults.
- Collaborated with developers and project managers to diagnose and resolve client-reported technical issues.

Web Developer | XDNA Digital Agency Inc.

July 2022 – March 2024

- Diagnosed and resolved website, server, and API production incidents, maintaining uptime and stability across client environments.
- Supported deployment processes and integrated third-party APIs and custom business solutions.
- Mentored intern developers on systematic troubleshooting practices.

Front-End Developer | Blink Digital

November 2021 – July 2022

- Supported website deployment and server configuration; investigated and resolved technical faults across multiple company sites.
- Assisted with production support and ongoing system maintenance.

Web Developer | Sytian Productions

June 2019 – October 2021

- Maintained WordPress sites and hosting environments; managed migrations, FTP transfers, and database updates.
- Acted as first-line technical contact for client hosting and website support requests.

IT Support Technician | Yaramay Computer Maintenance and Services

2018 – 2019

- Delivered on-site IT and desktop support for office users and small businesses, diagnosing hardware, software, and networking faults.
- Installed and configured desktop computers, printers, routers, and CCTV systems; configured internet connections and local area networks.
- Performed preventive maintenance and coordinated hardware procurement with vendors.

CLIENT SUPPORT RECORD

- Developed, maintained, and provided ongoing technical support for 50+ websites and web applications, resolving hosting, DNS, SSL, email, deployment, and performance issues.
- Delivered remote technical support to clients across the United States, Canada, the United Kingdom, and Australia, working across time zones with non-technical end users.

CERTIFICATIONS & TECHNICAL TRAINING

Google IT Support Professional Certificate — Google via Coursera | Completed July 2026 | Credential ID: OTZHR9DSV0VZ

- Five-course program covering troubleshooting methodology, customer service, networking, operating systems, system administration, and security.

CompTIA Network+ (N10-009) Professional Training — RivanCyber Training Institute Inc.

- Configured Cisco routers, switches, access points, and IP phones; performed network troubleshooting across TCP/IP, routing, and switching.
- Built and managed virtual machines in VMware Workstation and Oracle VirtualBox running Windows Server, Windows 10/11, and Linux.

TECHNICAL PROJECTS

Windows Server 2022 Home Lab — Self-built and self-administered

- Deployed and administered Windows Server 2022 with Active Directory Domain Services, DNS, DHCP, Group Policy, shared folders, and NTFS permissions.

Self-Hosted Services & Automation Lab

- Stood up and maintained containerised local services with Docker, including a self-hosted AI inference stack and n8n workflow automation, connected via REST APIs and webhooks.

EDUCATION

Bachelor of Science in Information Technology — New England College | 2019
